- Core Java
- JavaScript
- SQL
- Front End Coding
- Problem-Solving
- Bootstrap
- Git
- Strong Communication
- After Effects
- Problem Solving

PROJECT

IOT BASED AUTOMATIC TOUR GUIDE SYSTEM USING AT89S51 MICROPROCESSOR

We proposed a multi-device, location-aware guide supporting museum or visits. Its main contribution is in the ability to exploit multi-device environments, in which users can freely move about with their mobile guide. The access to museum or visit information can benefit from the availability of multiple devices which are detected through RFID tags.

JAVA SCRIPT AND REACT.JS PROJECT

- **to do list**

(To-Do List is an application specially made for keeping track of errands or tasks that need to be done. This app will be like a task manager where the user could enter the tasks they need to do.)

- **Clock**

(Using JavaScript. In HTML CSS we made o'clock. Which shows a time of different time zone.)

- **web portfolio**

(A portfolio website is a unique way to showcase your work and let others know about yourself)
